

Leg 10 – new version for 2017

To avoid the turning traffic around Walmart and the confusion of the cemetery loop we used last year the last relay leg has been adjusted. This year runners will come into Pullman on the Johnson road as usual but then turn right for an out and back section on the Old Moscow Rd. Upon returning to Johnson Road runners will pick up the paved trail that connects with Bishop Boulevard. A left turn on Bishop Boulevard returns runners directly to the finish at Summit Therapy. This leg is 4 miles long and at 139ft has less elevation gain than the previous route.
